TINED WEEDER

AEROSTAR-EXACT

AEROSTAR-EXACT

PRECISE WEEDING TECHNOLOGY RIGHT ON THE POINT

- Breaks open the soil crust effectively
- Intensive weed control
- Long tines for optimal soil adaptation
- The large tine passage allows still enough space also for larger plants.
- The slightly „on-hold” positioned tines work under the plant and lift the leaves from soil. Therefore the soil between the rows is broken open and aerated without injuring the leaves by „dragged” tines.

Equipment AEROSTAR-EXACT

Tines Ø 7 mm, 600 mm long

No frame distortion - central hydraulic tine adjustment per section

Line spacing 2,5 cm

Accurate depth control through front support wheels and rear oscillating chassis

Large, bearing mounted support wheels track width approx. 1,36 - 1,45 m

Front and rear fixed sections

Working width 6 m (12 m on request)
